The aims of Networking in education and research, 3

As a result of our two previous working sessions in 2019 and 2022, we have established the agenda for the future activities.

The networking means giving new opportunities in teaching and research. That is why our most concrete objective is to create a network of French-Bosnian slavists which will, on the one hand, boost the exchange of students and teachers within the framework of the E+ KA171 programme, and on the other hand, strengthen research in the field of Slavic studies.

Good networking creates spaces where scientists and professors are in position to exchange ideas, methodological or scientific approaches and to build new projects.

To increase the French-Bosnian cooperation, we have decided to organize the **3rd Staff Training Week from 13th to 19th November 2022 at the University of Poitiers** dedicated on "Slavic Studies in the 21st century: prospects and challenges".

We would like to invite teachers of Slavic languages (Russian, Polish, Czech, Serbian, Croatian, Bosnian, etc.) from the universities of Bosnia and Herzegovina to take part in this STW.

During this working week we will also organize an international conference on "**Slavic Studies Today: Liminality and Mediation**" and we invite that colleagues from the universities of Bosnia and Herzegovina to take active part in it.
